PROJECTS

FarmTrace - Blockchain-Based Supply Chain Transparency for Agricultural Produce | [Link](#)

- Developed a blockchain-based **traceability platform** for real-time **farm-to-fork provenance** from initial dispatch by the farmer to checkpoints.
- **Contract farming** platform enabling escrow-backed payments with **automated milestone releases (20–30–50%)**, eliminating manual settlement delays .
- Built an **AI-based crop health analysis** module to **detect diseases and pest issues** from **field images**, enabling early intervention and quality assessment.
- Reduced supply chain traceability time from **~7 days to ~2 seconds** using **QR-based verification** with blockchain-backed audit trails .

PaperTrail - AI-Powered Research Literature Analysis System | [Link](#)

- Engineered a **multi-agent LLM** pipeline to automate literature review, reducing analysis time from **3–7 days to ~10 minutes**
- Built a **scalable** ingestion + parsing system extracting structured metadata across **20–50 papers/query**.
- Implemented **RAG architecture** enabling **citation-backed Q&A** with improved retrieval precision
- Developed a **knowledge graph + visualization layer** (React Flow) to uncover cross-paper relationships, contradictions, and research gaps

DevYard - Marketplace for Unfinished Engineering Projects | [Github](#)

- Built a **collaborative platform** to revive **dormant GitHub projects**, enabling structured adoption and contribution workflows
- Developed an **AI-driven repository analysis** system using **CodeLlama** to summarize codebases and detect tech stacks across repositories
- Implemented automated **roadmap generation**, producing actionable next steps and reducing manual project **analysis effort by ~70%**.

HardReset- Real-time Multiplayer Social deduction Coding Game | [Github](#) | [Demo](#)

- Developed a real-time multiplayer coding platform with role-based gameplay (Crewmate vs Impostor)
- Integrated AI-based problem generation and performance analysis
- Built live leaderboard and voting mechanics, enhancing engagement and competitive dynamics

EDUCATION

Thadomal Shahani Engineering College(TSEC)

Bachelor of Engineering (B.E) in Computer Engineering –7.8/10

2023-Present

SKILLS

- Languages: Java, Python, Solidity
- Frontend: React.js
- Backend: Node.js, FastAPI
- AI/ML: LLM Integration, OCR, Retrieval-based Systems
- Databases: MySQL, PostgreSQL
- Blockchain: Solidity, Ethers.js, MetaMask, Ganache, Thirdweb, Polygon
- Tools: Git, GitHub

ACHIEVEMENTS

1x Hackathon Winner - Atharva University, Malad

CERTIFICATIONS

- OCI 2025 AI Foundations Associate (Oct 2025)
- Postman API Fundamentals Student Expert (Sept 2025)
- Career Essentials in Data Analysis – Microsoft & LinkedIn (Jan 2025)
- Career Essentials in Generative AI– Microsoft & LinkedIn (Dec 2024)
